Albright's hereditary osteodystrophy
Albright's hereditary osteodystrophy: *syndrome of the month*, 779
Parental origin of Gsα gene mutations in Albright's hereditary osteodystrophy, 835
Parental origin of transcription from the human GNAS1 gene, 163: *abs*, 607
Paternal and maternal transmission of pseudohypoparathyroidism type Ia in a family with Albright hereditary osteodystrophy: no evidence of genomic imprinting: *letter*, 84
Albumin, A point mutation in the human serum albumin gene results in familial dysalbuminaemic hyperthyroxinaemia, 355
Aldolase B gene, Null alleles of the aldolase B gene in patients with hereditary fructose intolerance, 499
Aldosterone, Angiotensin I converting enzyme polymorphism in different groups and its association with hypertension, plasma renin activity, and aldosterone, 172 *abs*
Alphafetoprotein, Impact of screening using maternal serum AFP and hCG on the birth incidence of Down's syndrome in the west of Scotland, 166 *abs*
Alzheimer's disease, Confirmation of association between the e4 allele of apolipoprotein E and Alzheimer's disease, 197
Aminolaevulinate synthase, Pyridoxine-refractory congenital sideroblastic anaemia with evidence for autosomal inheritance: exclusion of linkage to ALAS2 at Xp11.21 by polymorphism analysis, 213
Amnion rupture sequence, Diagnostic distinction between anencephaly and amnion rupture sequence based on skeletal analysis, 823
Amplification mismatch analysis, Amplification mismatch analysis as a method of screening for mutations in genetic disorders, 162 *abs*
Amyloid polyneuropathy
Amyloid polyneuropathy in two German-American families: a new transthyretin variant (Val 107), 416
Geographical distribution of TTR met30 carriers in northern Sweden: discrepancy between carrier frequency and prevalence rate, 351
Amyotrophic lateral sclerosis, Identification of the superoxide dismutase (SOD1) Ile113Thr mutation in three unrelated amyotrophic lateral sclerosis patients, 175 *abs*
Anchoring fibril abnormalities, Genetic linkage to the type VII collagen gene (COL7A1) in 26 families with generalised recessive dystrophic epidermolysis bullosa and anchoring fibril abnormalities, 745
Anderson-Fabry disease, X inactivation studies in Anderson-Fabry disease and X linked ectodermal dysplasia, 169 *abs*
Anencephaly
Diagnostic distinction between anencephaly and amnion rupture sequence based on skeletal analysis, 823
Female predisposition to cranial neural tube defects is not because of a difference between the sexes in the rate of embryonic growth or development during neurulation, 383
Aneurysms, 3-M syndrome and intracerebral aneurysms: *letter*, 898
Angiotensin I converting enzyme, Angiotensin I converting enzyme polymorphism in different groups and its association with hypertension, plasma renin activity, and aldosterone, 172 *abs*
Anophthalmia, Anophthalmia with cleft palate and micrognathia: a new syndrome?, 960
Anticipation, Anticipation in Swedish families with bipolar affective disorder, 686
APC gene, Deletions of the entire APC gene are associated with sessile colonic adenomas: *letter*, 426
APC mutation, APC mutation associated with late onset of familial adenomatous polyposis, 888
Apolipoprotein
Apolipoprotein CII-Padova (Tyr37→stop) as a cause of chylomicronaemia in an Italian kindred from Siculiana, 622
Characterisation of six patients who are double heterozygotes for familial hypercholesterolaemia and familial defective apolipoprotein B-100, 172 *abs*
Confirmation of association between the e4 allele of apolipoprotein E and Alzheimer's disease, 197
Arachnodactyly, Congenital contractural arachnodactyly (Beals syndrome): *syndrome of the month*, 640
ARC syndrome, Liver histology in the arthrogryposis multiplex congenita, renal dysfunction, and cholestasis (ARC) syndrome, 62: *letter*, 820
ARMS test, An investigation of sample taking technique for the ARMS cystic fibrosis test, 173 *abs*
Art, Genetics in art, 420
Arthrogryposis, Lethal congenital contracture syndrome: further delineation and genetic aspects, 521
Arthrogryposis multiplex congenita, Liver histology in the arthrogryposis multiplex congenita, renal dysfunction, and cholestasis (ARC) syndrome, 62: *letter*, 820
Arylsulphatase A gene, The arylsulphatase A gene and molecular genetics of metachromatic leucodystrophy: *review article*, 663
Arylsulphatase A pseudodeficiency, Frequency of arylsulphatase A pseudodeficiency associated mutations in a healthy population, 667
Aspartylglucosaminuria, Aspartylglucosaminuria in northern Norway: a molecular and genealogical study, 360

Asymmetry anomaly, Asymmetry and skin pigmentary anomalies in chromosome mosaicism, 694
Ataxia-ocular motor apraxia syndrome, Ataxia-ocular motor apraxia syndrome: an investigation of cellular radiosensitivity of patients and their families, 953
Ataxia telangiectasia, Ataxia-ocular motor apraxia syndrome: an investigation of cellular radiosensitivity of patients and their families, 953
Atrioventricular septal defect, Exclusion of atrioventricular septal defect in a large dominant pedigree from the Down's syndrome region, 172 *abs*
Autosomal dominant disorders, Diagnosis of adult polycystic kidney disease by genetic markers and ultrasonographic imaging in a voluntary family register, 115
Autosomal recessive disorders
  Autosomal recessive disorders among Arabs: an overview from Kuwait, 224
  Low segregation ratios in autosomal recessive disorders: *letter*, 85
  Microcephaly and congenital nephrotic syndrome owing to diffuse mesangial sclerosis: an autosomal recessive syndrome, 121
Autosomal structural rearrangement, Mosaicism with a normal cell line and an autosomal structural rearrangement, 108
Azerbaijan, Thalassaemia in Azerbaijan, 209

Bart-Pumphrey syndrome, Familial leuconychia, knuckle pads, hearing loss, and palmoplantar hyperkeratosis: an additional family with Bart-Pumphrey syndrome, 68
Barth's syndrome, Prenatal diagnosis of X linked cardiomyopathy with neutropenia (Barth's syndrome) using DXS15 (DX13), 169 *abs*
Bayesian approach, Forensic medicine, PCR, and Bayesian approach: *letter*, 896
Beals syndrome, Congenital contractural arachnodactyly (Beals syndrome): *syndrome of the month*, 640
Becker muscular dystrophy
  An inherited dystrophin deletion without muscle weakness: *letter*, 505
  Deletions in the 5′ region of dystrophin and resulting phenotypes, 843
Beckwith-Wiedemann syndrome
  Beckwith-Wiedemann syndrome: *syndrome of the month*, 560
  Mosaic uniparental disomy in Beckwith-Wiedemann syndrome, 749
Best's disease, Molecular evidence for non-penetrance in Best's disease, 388
Bipolar affective disorder, Anticipation in Swedish families with bipolar affective disorder, 686
Birth defects, Counselling for birth defects: the differing perspectives of obstetricians, geneticists, and genetic counsellors, 164 *abs*
Bladder exstrophy, Four cases of bladder exstrophy in two families, 490
Blaschko's lines, Epidermal mosaicism and Blaschko's lines: *letter*, 260
Blepharophimosis, Blepharophimosis sequence and diaphragmatic hernia associated with interstitial deletion of chromosome 3 (46,XY,del(3)(q21q23)), 647
Bone marrow, Bone marrow proliferation as reflected in ALL cytogenetics: relevance for prognosis and treatment, 164 *abs*
Book reviews

  White BA, *editor*. PCR protocols–current methods and applications, 87
Brachydactyly, Spastic paraplegia, dysarthria, brachydactyly, and cone shaped epiphyses: confirmation of the Fitzsimmons syndrome, 251
Breast cancer
  Genetic epidemiology of early onset breast cancer, 944
  Neoplastic diseases in families of breast cancer patients, 618
  Pedigree analysis of newly diagnosed breast cancer: implications for screening, 168 *abs*
Butyrylcholinesterase, A new detection method for the K variant of butyrylcholinesterase based on PCR primer introduced restriction analysis (PCR-PIRA), 576

CAG repeats
  Instability of CAG repeats in Huntington's disease, 377
  Study of the Huntington's disease gene CAG repeats in schizophrenic patients shows overlap of the normal and HD affected ranges but absence of correlation with schizophrenia, 690

CAG trinucleotide repeat, Expanded CAG trinucleotide repeat of Huntington's disease gene in a patient with schizophrenia and normal striatal histology: *letter*, 658
Cancer, familial, Neoplastic diseases in families of breast cancer patients, 618
Cancer families, The use of loss of constitutional heterozygosity data to ascertain the location of predisposing genes in cancer families, 448
Cancer family syndrome, Muir-Torre syndrome: a variant of the cancer family syndrome, 627
CAPP Study, The CAPP Study: a new European concerted action to permit placebo controlled trials in carriers of familial adenomatous polyposis, 171 *abs*
Cardiomyopathy, Prenatal diagnosis of X linked cardiomyopathy with neutropenia (Barth's syndrome) using DXS15 (DX13), 169 *abs*
Carrier screening, Evaluation of laboratory methods for cystic fibrosis carrier screening: reliability, sensitivity, specificity, and costs, 545
"CATCH 22", "CATCH 22" sans cardiac anomaly, thymic hypoplasia, cleft palate, and hypocalcaemia: cAtch 22. A common result of 22q11 deficiency? *letter*, 741
Caudate nucleus, Progressive hemifacial atrophy with agenesis of the head of the caudate nucleus, 969
Cephalometric analysis, Cephalometric analysis of Rapp-Hodgkin syndrome, 758
Ceroid lipofuscinoses, Stargardt's disease is not allelic to the genes for neuronal ceroid lipofuscinoses, 222
Charcot-Marie-Tooth disease
  Charcot-Marie-Tooth disease in northern Sweden: pedigree analysis and the presence of the duplication in chromosome 17p11.2, 435
  X linked Charcot-Marie-Tooth disease (CMTX1): a study of 15 families with 12 highly informative polymorphisms, 193
Charcot-Marie-Tooth disease type 1, Non-radioactive detection of 17p11.2 duplication in CMT1A: a study of 78 patients, 880
Charcot-Marie-Tooth disease type 1B, Linkage and mutation analysis in an extended family with Charcot-Marie-Tooth disease type 1B, 811
Chemiluminescent detection, Chemiluminescent detection of blotted PCR products (CB-PCR) of two CAG dynamic mutations (Huntington's disease and spinocerebellar ataxia type 1), 654
Children
  The genetic testing of children: *editorial*, 743
  The genetic testing of children, 785
Chile, Genetic epidemiology of single gene defects in Chile, 702
Chimaerism
  Chimaerism shown by cytogenetics and DNA polymorphism analysis, 816
  Male/female chimaerism determined by cytogenetic analysis and DNA polymorphisms, 174 *abs*
Cholestasis, Liver histology in the arthrogryposis multiplex congenita, renal dysfunction, and cholestasis (ARC) syndrome, 62: *letter*, 820
Cholinesterase gene, A PCR based method to determine the Kalow allele of the cholinesterase gene: the E_1^k allele frequency and its significance in the normal population, 248
Choroid inherited disease, Recent advances in the gene map of inherited eye disorders: primary hereditary diseases of the retina, choroid, and vitreous: *review article*, 903
Chromosome abnormalities
  18q− and 18q+ mosaicism in a mentally retarded boy (46,XY,del(18)(q21)/46,XY,iso psu dic(18)(q23), 168 *abs*
  A comparison of the clinical and cytogenetic findings in nine patients with a ring (X) cell line and 16 45, X patients, 528
  A gene for pachyonychia congenita is closely linked to the keratin gene cluster on 17q12–q21, 675
  A male with a de novo translocation involving loss of 15q11q13 material and Prader-Willi syndrome, 478
  A newborn with ring chromosome 10, aganglionic megacolon, and renal hypoplasia, 804
  Adenomatous polyposis coli and a cytogenetic deletion of chromosome 5 resulting from a maternal intrachromosomal insertion, 312
  Allele loss on chromosome 16p in hamartomata and tumours from patients with tuberous sclerosis, 164 *abs*
  An extra band within the human 9qh+ region that behaves like the surrounding constitutive heterochromatin, 632
  An interstitial deletion of chromosome 7(q35), 738
  Another patient with an interstitial deletion of chromosome 9: case report and a review of six cases with del(9)(q22q32), 156
  Apparent SMA I unlinked to 5q, 242
  Assessment of Yqh translocations, 978
  Association of 1078 del T cystic fibrosis mutation with severe disease, 159
  Asymmetry and skin pigmentary anomalies in chromosome mosaicism, 694
  Balanced reciprocal whole arm translocation t(3;9): analysis by fluorescence in situ hybridisation, 74
  Blepharophimosis sequence and diaphragmatic hernia associated with interstitial deletion of chromosome 3 (46,XY,del(3)(q21q23)), 647
  Case of direct duplication of part of 2p: ?related to paternal pericentric inversion of chromosome 2, 169 *abs*
  "CATCH 22" sans cardiac anomaly, thymic hypoplasia, cleft palate, and hypocalcaemia: cAtch 22. A common result of 22q11 deficiency? *letter*, 741
  Charcot-Marie-Tooth disease in northern Sweden: pedigree analysis and the presence of the duplication in chromosome 17p11.2, 435
  Close linkage of a gene for X linked deafness to three microsatellite repeats at Xq21 in radiologically normal and abnormal families, 916
  "Compensatory" uniparental disomy of chromosome 21 in two cases, 534
  Crouzon syndrome is not linked to craniosynostosis loci at 7p and 5qter, 219
  De novo 14q32 microdeletion on an inherited t(14; 21) Robertsonian translocation resulting in multiple congenital abnormalities in an apparently balanced translocation carrier, 169 *abs*
  De novo deletion (2) (p11.2p13): clinical, cytogenetic, and immunological data, 72
  Del(18p) syndrome with a single central maxillary incisor: *letter*, 86
  Deletion mapping of the DXS986, DXS995, and DXS1002 loci defines their order within Xq21, 344
  Detection of de novo mutations and analysis of their origin in families with X linked hypohidrotic ectodermal dysplasia, 287
  Diaphragmatic herniae and translocations involving 8q22 in two patients, 735
  Duplication of 16q22→qter confirmed by fluorescence in situ hybridisation and molecular analysis, 884
  Elucidation of structural abnormalities of the X chromosome using fluorescence in situ hybridisation with a Y chromosome painting probe, 206
  Familial half cryptic translocation t(9;17), 712
  Familial pericentric inversion of chromosome 1 (p34q23) and male infertility with stage specific spermatogenic arrest, 573
  Familial pericentric inversion inv(8)(p23q11), 201
  Fine mapping of the facioscapulohumeral muscular dystrophy gene region on 4q35, 165 *abs*
  Fragile site at Xq27–28 located distal to FRAXE and found in a normal male, 173 *abs*
  Genetic heterogeneity in hereditary haemorrhagic telangiectasia, 925
  Genetic heterogeneity in hereditary haemorrhagic telangiectasis: possible correlation with clinical phenotype, 927
  Genetic heterogeneity in X linked hydrocephalus: a family showing linkage to markers in Xq27.3, 167 *abs*

Hirschsprung's disease associated with a deletion of chromosome 10 (q11.2q21.2): a further link with the neurocristopathies?, 325
Hydrocephalus in an infant with trisomy, 22, 141
Identification of interstitial 22q11 deletions in conotruncal anomaly face syndrome, 167 *abs*
Identification of a key recombinant which assigns the incomplete congenital stationary night blindness gene proximal to MAOB, 580
Instability of lymphocyte chromosomes in a girl with Rothmund-Thomson syndrome, 570
Intrachromosomal triplication of 15q11–q13, 798
Isolation and characterisation of a panel of cosmids which allows unequivocal identification of chromosome deletions involving the RB1 gene using fluorescence in situ hybridisation, 334
Laminin A variant gene (LAMA3) is present on chromosome 6q21, 164 *abs*
Linkage of hereditary haemorrhagic telangiectasia to chromosome 9q34 and evidence for locus heterogeneity, 933
Linkage of a non-specific X linked mental retardation gene to Xq26.1, 172 *abs*
Male/female chimaerism determined by cytogenetic analysis and DNA polymorphisms, 174 *abs*
Maternal serum screening for Down's syndrome and other fetal chromosomal abnormalities, 166 *abs*
Maternal uniparental disomy of chromosome 13 in a phenotypically normal child, 644
Molecular analysis of human trisomies 13 and 18, 175 *abs*
Molecular characterisation of chromosome 4p deletions resulting in Wolf-Hirschhorn syndrome, 103
Mosaic uniparental disomy in Beckwith-Wiedemann syndrome, 749
Mouse homologues of human hereditary disease: *review article*, 1
Multiple origins of X chromosome tetrasomy: *letter*, 424
Non-radioactive detection of 17p11.2 duplication in CMT1A: a study of 78 patients, 880
Parental origin of the X chromosome in a patient with a Robertsonian translocation and Turner's syndrome, 255
Partial monosomy of 7q32 in a case of de novo rcp(7;15)(q32;q15), 413
Partial trisomy for 2q in a patient with dir dup(2)(q33.1q35), 652
Partial trisomy 3q causing mild Cornelia de Lange phenotype, 150
Paternal pericentric inversion of chromosome 4 as a cause of recurrent pregnancy loss, 153
Pseudodicentric chromosome 18 diagnosed by chromosome painting and primed in situ labelling (PRINS), 99
Pulmonary atresia associated with maternal 22q11.2 deletion: possible parent of origin effect in the conotruncal anomaly face syndrome, 830
Refinement of the chromosomal position of the X linked juvenile retinoschisis gene, 972
Screening for Y mosaicism in patients with Turner's syndrome, 163 *abs*
Systemic search for uniparental disomy, 163 *abs*
Testis determining gene(s) on the X chromosome short arm: chromosomal localisation and possible role in testis determination: *letter*, 349
The morbid anatomy of the human genome: chromosomal location of mutations causing disease: *review article*, 265
Trisomy 12 mosaicism in a 7 year old girl with dysmorphic features and normal mental development, 253
Trisomy 8 syndrome owing to isodicentric 8p chromosomes: regional assignment of a presumptive gene involved in corpus callosum development, 238
Trisomy X in a female member of a family with X linked severe combined immunodeficiency: implications for carrier diagnosis, 717
Uniparental disomy in man, 162 *abs*
Value of chromosome painting in determining the chromosomal outcome of offspring of a 12;16 translocation carrier, 234
X;Y translocation in a girl with short stature and some features of Turner's syndrome: cytogenetic and molecular studies, 649
X inactivation patterns in female monozygotic twins and their families, 754
X linked Charcot-Marie-Tooth disease (CMTX1): a study of 15 families with 12 highly informative polymorphisms, 193
Chromosome painting
Elucidation of structural abnormalities of the X chromosome using fluorescence in situ hybridisation with a Y chromosome painting probe, 206
Value of chromosome painting in determining the chromosomal outcome of offspring of a 12;16 translocation carrier, 234
Chromosomes, supernumerary marker, Inv dup(15) supernumerary marker chromosomes: *review article*, 585
Chylomicronaemia, Apolipoprotein CII-Padova (Tyr 37→stop) as a cause of chylomicronaemia in an Italian kindred from Siculiana, 622
Cleft hand/foot, Cleft hand/foot: clinical and developmental aspects: *syndrome of the month*, 726
Cleft lip, Interpreting the evidence for an association between the retinoic acid receptor locus and non-syndromic cleft lip with or without cleft palate: *letter*, 425
Cleft lip/palate, Syndactyly, ectodermal dysplasia, and cleft lip/palate: *syndrome of the month*, 957
Cleft palate
Anophthalmia with cleft palate and micrognathia: a new syndrome?, 960
Facial clefts in the west of Scotland in the period 1980–1984: epidemiology and genetic diagnoses, 126
COL1A2 gene, The clinical features of Ehlers-Danlos syndrome type VIIB resulting from a base substitution at the splice acceptor site of intron 5 of the COL1A2 gene, 306
Collagen gene type VII (COL7A1), Genetic linkage to the type VII collagen gene (COL7A1) in 26 families with generalised recessive dystrophic epidermolysis bullosa and anchoring fibril abnormalities, 745
Collagen type I α2 gene point mutation, Determination of a new collagen type I α2 gene point mutation which causes a Gly640 Cys substitution in osteogenesis imperfecta and prenatal diagnosis by DNA hybridisation, 965
Colonic adenomas, Deletions of the entire APC gene are associated with sessile colonic adenomas: *letter*, 426
Compensatory uniparental disomy, "Compensatory" uniparental disomy of chromosome 21 in two cases, 534
Complementation studies, Complementation studies in Niemann-Pick disease type C indicate the existence of a second group, 317
Concerted Action Polyposis Prevention Study, The CAPP Study: a new European concerted action to permit placebo controlled trials in carriers of familial adenomatous polyposis, 171 *abs*
Cone shaped epiphyses, Spastic paraplegia, dysarthria, brachydactyly, and cone shaped epiphyses: confirmation of the Fitzsimmons syndrome, 251
Congenital contractural arachnodactyly, Congenital contractural arachnodactyly (Beals syndrome): *syndrome of the month*, 640
Congenital heart defects, Genetic study of congenital heart defects in Northern Ireland (1974–1978), 858
Congenital heart disease, Hereditary pancreatic hypoplasia, diabetes mellitus, and congenital heart disease: a new syndrome?, 331
Congenital malformations, A gene map of congenital malformations: *review article*, 507
Conotruncal anomaly face syndrome, Pulmonary atresia associated with maternal 22q11.2 deletion: possible parent of origin effect in the conotruncal anomaly face syndrome, 830
Consanguinity, Ascertainment of consanguinity in the

antenatal clinic, 162 *abs*
Contruncal anomaly face syndrome, Identification of interstitial 22q11 deletions in contruncal anomaly face syndrome, 167 *abs*
Cornelia de Lange syndrome, Partial trisomy 3q causing mild Cornelia de Lange phenotype, 150
Corpus callosum, Trisomy 8 syndrome owing to isodicentric 8p chromosomes: regional assignment of a presumptive gene involved in corpus callosum development, 238
Correction, 88
Cosmid contigs, FISH detection of trisomy 21 in interphase by the simultaneous use of two differently labelled cosmid contigs, 679
Cosmids, Isolation and characterisation of a panel of cosmids which allows unequivocal identification of chromosome deletions involving the RB1 gene using fluorescence in situ hybridisation, 334
Costello syndrome
Costello syndrome: natural history and differential diagnosis of cutis laxa, 486
Cutis laxa: a feature of Costello syndrome: *letter*, 85
Counselling
Client satisfaction as outcome measure for audit of a clinical genetic service, 170 *abs*
Counselling for birth defects: the differing perspectives of obstetricians, geneticists, and genetic counsellors, 164 *abs*
Counselling following diagnosis of a fetal abnormality, 864
The provision of counselling for people with haemoglobinopathy trait in South Glamorgan, Wales, 170 *abs*
Cowden syndrome, Cowden syndrome and Lhermitte-Duclos disease in a family, 458
Cranial neural tube defects, Female predisposition to cranial neural tube defects is not because of a difference between the sexes in the rate of embryonic growth or development during neurulation, 383
Craniosynostosis, Crouzon syndrome is not linked to craniosynostosis loci at 7p and 5qter, 219
CTG amplification, Intelligence quotient profile in myotonic dystrophy, intergenerational deficit, and correlation with CTG amplification, 300
CTG repeat number, High CTG repeat number in nodular thyroid tissue from a myotonic dystrophy patient, 891
CTG trinucleotide repeat
Absence of myotonic dystrophy in southern African Negroids is associated with a significantly lower number of CTG trinucleotide repeats, 37
French myotonic dystrophy families show expansion of a CTG repeat in complete linkage disequilibrium with an intragenic 1 kb insertion, 33
Cutis laxa
Costello syndrome: natural history and differential diagnosis of cutis laxa, 486
Cutis laxa: a feature of Costello syndrome: *letter*, 85
Cystic fibrosis
A cystic fibrosis patient homozygous for the new frameshift mutation 936delTA: description and clinical data, 369
An investigation of sample taking technique for the ARMS cystic fibrosis test, 173 *abs*
Association of 1078 del T cystic fibrosis mutation with severe disease, 159
Automated analysis of multiplex microsatellites, 937
Evaluation of laboratory methods for cystic fibrosis carrier screening: reliability, sensitivity, specificity, and costs, 545
Mutation analysis in 600 French cystic fibrosis patients, 541
Severe pulmonary and digestive disease in a cystic fibrosis child homozygous for G542X: *letter*, 84
The impact of population based screening for carriers of cystic fibrosis, 364
Cystic fibrosis mutations, A cluster of cystic fibrosis mutations in exon 17b of the CFTR gene: a site for rare mutations, 731
Deafness, Close linkage of a gene for X linked deafness to three microsatellite repeats at Xq21 in radiologically normal and abnormal families, 916
Deafness, X linked, Deletion mapping of the DXS986, DXS995, and DXS1002 loci defines their order within Xq21, 344
Deletion
18q− and 18q+ mosaicism in a mentally retarded boy (46,XY,del(18)(q21)/46,XY,iso psu dic(18)(q23), 168 *abs*
An interstitial deletion of chromosome 7(q35), 738
Another patient with an interstitial deletion of chromosome 9: case report and a review of six cases with del(9)(q22q32), 156
Association of 1078 del T cystic fibrosis mutation with severe disease, 159
Blepharophimosis sequence and diaphragmatic hernia associated with interstitial deletion of chromosome 3 (46,XY,del(3)(q21q23)), 647
De novo deletion (2) (p11.2p13): clinical, cytogenetic, and immunological data, 72
Del(18p) syndrome with a single central maxillary incisor: *letter*, 86
Deletion mapping of the DXS986, DXS995, and DXS1002 loci defines their order within Xq21, 344
Deletions in the 5′ region of dystrophin and resulting phenotypes, 843
On the origin of deletions and point mutations in Duchenne muscular dystrophy: most deletions arise in oogenesis and most point mutations result from events in spermatogenesis, 183
Pulmonary atresia associated with maternal 22q11.2 deletion: possible parent of origin effect in the conotruncal anomaly face syndrome, 830
Denys-Drash syndrome, The Denys-Drash syndrome: *syndrome of the month*, 471
Dermal eccrine cylindromatosis, Dermal eccrine cylindromatosis: *syndrome of the month*, 321
Developmental retardation
A syndrome of hypotonia, psychomotor retardation, seizures, delayed and dysharmonic skeletal maturation, and congenital fibre type disproportion, 405
Natural history and postmortem anatomy of a patient with tetra-amelia, ectodermal dysplasia, peculiar face, and developmental retardation (MIM 273390): *letter*, 980
Diabetes mellitus, Hereditary pancreatic hypoplasia, diabetes mellitus, and congenital heart disease: a new syndrome?, 331
Diaphragmatic herniae, Diaphragmatic herniae and translocations involving 8q22 in two patients, 735
Dibenzepin, Drug induced VATER association: is dibenzepin a possible cause: *letter*, 423
DIDMOAD, Mitochondrial mutation commonly associated with Leber's hereditary optic neuropathy observed in a patient with Wolfram syndrome (DIDMOAD), 328
DiGeorge sequence, Velocardiofacial syndrome and DiGeorge sequence: *letter*, 423
Dilated cardiomyopathy, Absence of linkage between idiopathic dilated cardiomyopathy and candidate genes involved in the immune function in a large Indian pedigree, 766
Dinucleotide CA repeat markers, Presymptomatic diagnosis in families with adenomatous polyposis using highly polymorphic dinucleotide CA repeat markers flanking the APC gene, 442
Disease, The morbid anatomy of the human genome: chromosomal location of mutations causing disease: *review article*, 265
Disomy, Maternal uniparental disomy of chromosome 13 in a phenotypically normal child, 644
DNA
Amplification mismatch analysis as a method of screening for mutations in genetic disorders, 162 *abs*
Diagnosis of adult polycystic kidney disease by genetic markers and ultrasonographic imaging in a voluntary family register, 115

Identification by molecular diagnosis of mosaic Turner's syndrome in an obligate carrier female for fragile X syndrome, 76
DNA analysis, First trimester prenatal diagnosis of Menkes disease by DNA analysis, 615
DNA polymorphism analysis, Chimaerism shown by cytogenetics and DNA polymorphism analysis, 816
Dopamine D3 receptor locus, Homozygosity at the dopamine D3 receptor locus is not associated with schizophrenia: *letter*, 260
Dopamine D4 receptor polymorphism, No association between dopamine D4 receptor polymorphism and manic depressive illness: *letter*, 897
Down-Turner syndrome, Down-Turner syndrome: case report and review, 807
Down's syndrome
Changes in the maternal serum concentrations of PAPP-A and SP-1 in Down's syndrome pregnancies between the first and second trimesters, 170 *abs*
Exclusion of atrioventricular septal defect in a large dominant pedigree from the Down's syndrome region, 172 *abs*
FISH detection of trisomy 21 in interphase by the simultaneous use of two differently labelled cosmid contigs, 679
Impact of screening using maternal serum AFP and hCG on the birth incidence of Down's syndrome in the west of Scotland, 166 *abs*
Maternal serum screening for Down's syndrome and other fetal chromosomal abnormalities, 166 *abs*
Trisomy 18 and trisomy 21 mosaicism in a Down's syndrome patient, 418
Duchenne muscular dystrophy
An inherited dystrophin deletion without muscle weakness: *letter*, 505
Automated analysis of multiplex microsatellites, 937
Deletions in the 5′ region of dystrophin and resulting phenotypes, 843
Detection of point mutations in the dystrophin gene using SSCP analysis, 174 *abs*
On the origin of deletions and point mutations in Duchenne muscular dystrophy: most deletions arise in oogenesis and most point mutations result from events in spermatogenesis, 183
Use of a translation based method to screen rapidly for point mutations in Duchenne muscular dystrophy patients, 164 *abs*
Duplication
Duplication of 16q22→qter confirmed by fluorescence in situ hybridisation and molecular analysis, 884
Non-radioactive detection of 17p11.2 duplication in CMT1A: a study of 78 patients, 880
DXS markers
Deletion mapping of the DXS986, DXS995, and DXS1002 loci defines their order within Xq21, 344
X linked myotubular myopathy (MTM1) maps between DXS304 and DXS305, closely linked to the DXS455 VNTR and a new, highly informative microsatellite marker (DXS1684), 922
Dysarthria, Spastic paraplegia, dysarthria, brachydactyly, and cone shaped epiphyses: confirmation of the Fitzsimmons syndrome, 251
Dystrophin
An inherited dystrophin deletion without muscle weakness: *letter*, 505
Automated analysis of multiplex microsatellites, 937
Deletions in the 5′ region of dystrophin and resulting phenotypes, 843
Detection of point mutations in the dystrophin gene using SSCP analysis, 174 *abs*

Ectodermal dysplasia
A new dominantly inherited ectodermal dysplasia presenting with natal teeth, 171 *abs*
Cephalometric analysis of Rapp-Hodgkin syndrome, 758
Detection of de novo mutations and analysis of their origin in families with X linked hypohidrotic ectodermal dysplasia, 287
Natural history and postmortem anatomy of a patient with tetra-amelia, ectodermal dysplasia, peculiar face, and developmental retardation (MIM 273390): *letter*, 980
Syndactyly, ectodermal dysplasia, and cleft lip/palate: *syndrome of the month*, 957
X inactivation studies in Anderson-Fabry disease and X linked ectodermal dysplasia, 169 *abs*
Ectrodactyly, Cleft hand/foot: clinical and developmental aspects: *syndrome of the month*, 726
Ecuador, Facial morphometry of Ecuadorian patients with growth hormone receptor deficiency/Laron syndrome, 635
Ehlers-Danlos syndrome type VIIB, The clinical features of Ehlers-Danlos syndrome type VIIB resulting from a base substitution at the splice acceptor site of intron 5 of the COL1A2 gene, 306
Epidermal mosaicism, Epidermal mosaicism and Blaschko's lines: *letter*, 260
Epidermolysis bullosa, Genetic linkage to the type VII collagen gene (COL7A1) in 26 families with generalised recessive dystrophic epidermolysis bullosa and anchoring fibril abnormalities, 745
Epilepsy, Northern epilepsy syndrome: an inherited childhood onset epilepsy with associated mental deterioration, 177
Ethnic groups, Culture, kinship and genes: conference report, 893
Eye disorders, Recent advances in the gene map of inherited eye disorders: primary hereditary diseases of the retina, choroid, and vitreous: *review article*, 903
Eyes, Genetic heterogeneity in Rieger eye malformation, 340

FACC gene, Genetic mapping of the FACC gene and linkage analysis in Fanconi anaemia families, 868
Facial clefts, Facial clefts in the west of Scotland in the period 1980–1984, 126
Facial morphometry, Facial morphometry of Ecuadorian patients with growth hormone receptor deficiency/Laron syndrome, 635
Facial stigmata, Two brothers with characteristic facial appearance, severe psychomotor retardation, hypospadias, contractures, and other symptoms: a new recessive syndrome?, 65
Facioscapulohumeral muscular dystrophy
Fine mapping of the facioscapulohumeral muscular dystrophy gene region on 4q35, 165 *abs*
New mutation cases of facioscapulohumeral muscular dystrophy, 165 *abs*
Factor VIII gene, Three novel mutations in the factor VIII gene, 174 *abs*
Familial amyloid polyneuropathy
A study of 159 Portuguese patients with familial amyloidotic polyneuropathy (FAP) whose parents were both unaffected, 293
Amyloid polyneuropathy in two German-American families: a new transthyretin variant (Val 107), 416
Geographical distribution of TTR met30 carriers in northern Sweden: discrepancy between carrier frequency and prevalence rate, 351
Familial dysalbuminaemic hyperthyroxinaemia, A point mutation in the human serum albumin gene results in familial dysalbuminaemic hyperthyroxinaemia, 355
Familial hypercholesterolaemia, Characterisation of six patients who are double heterozygotes for familial hypercholesterolaemia and familial defective apolipoprotein B-100, 172 *abs*
Familial pericentric inversion, Familial pericentric inversion of chromosome 1 (p34q23) and male infertility with stage specific spermatogenic arrest, 573
Fanconi anaemia families, Genetic mapping of the FACC gene and linkage analysis in Fanconi an-

aemia families, 868
Fetal abnormality, Counselling following diagnosis of a fetal abnormality, 864
Fetal chromosome abnormalities, Maternal serum screening for Down's syndrome and other fetal chromosomal abnormalities, 166 *abs*
Fibrillin
A new missense mutation of fibrillin in a patient with Marfan syndrome, 338
Analysis of a fibrillin TGFβ-bp motif: putative cell adhesion properties, 174 *abs*
Screening for fibrillin (FBN1) mutations in Marfan syndrome, 162 *abs*
Fibrodysplasia ossificans progressiva, Fibrodysplasia ossificans progressiva: *letter*, 85
Finland, Lethal congenital contracture syndrome: further delineation and genetic aspects, 521
Fitzsimmons syndrome, Spastic paraplegia, dysarthria, brachydactyly, and cone shaped epiphyses: confirmation of the Fitzsimmons syndrome, 251
Fluorescence in situ hybridisation
Duplication of 16q22→qter confirmed by fluorescence in situ hybridisation and molecular analysis, 884
Elucidation of structural abnormalities of the X chromosome using fluorescence in situ hybridisation with a Y chromosome painting probe, 206
FISH detection of trisomy 21 in interphase by the simultaneous use of two differently labelled cosmid contigs, 679
FMR-1 triplet repeat allele, Expansion of an FMR-1 triplet repeat allele within the normal range: implications for the mechanism of FRA(X) mutation, 163 *abs*
Forensic medicine, Forensic medicine, PCR, and Bayesian approach: *letter*, 896
Fragile X
A fragile site at Xq27–28 located distal to FRAXE and found in a normal male, 173 *abs*
Clinical and molecular studies in fragile X patients with a Prader-Willi-like phenotype: *letters*, 260, 820
Complementary cytogenetic and molecular analysis of a referral for fragile X testing, 173 *abs*
Expansion of an FMR-1 triplet repeat allele within the normal range: implications for the mechanism of FRA(X) mutation, 163 *abs*
Identification by molecular diagnosis of mosaic Turner's syndrome in an obligate carrier female for fragile X syndrome, 76
Non-radioactive PCR based screening for fragile X syndrome, 173 *abs*
Prenatal diagnosis of fragile X syndrome: management of the male fetus with a premutation, 170 *abs*
The impact of genetic counselling on females in fragile X families, 950
France, French myotonic dystrophy families show expansion of a CTG repeat in complete linkage disequilibrium with an intragenic 1 kb insertion, 33
Friedreich's ataxia, Linkage disequilibrium between FD1-D9S202 haplotypes and the Friedreich's ataxia locus in a central-southern Italian population, 133
Fructose intolerance, Null alleles of the aldolase B gene in patients with hereditary fructose intolerance, 499
Fryns syndrome, Two fetuses with Fryns syndrome without diaphragmatic defects, 962
alpha-L-Fucosidase, Molecular basis of the common electrophoretic polymorphism (Fu1/Fu2) in human alpha-L-fucosidase: *letter*, 659

G542X mutation, Severe pulmonary and digestive disease in a cystic fibrosis child homozygous for G542X: *letter*, 84
Gaucher disease, type 1, Molecular characterisation of type 1 Gaucher disease families and patients, 401
Gene map
A gene map of congenital malformations: *review article*, 507
Recent advances in the gene map of inherited eye disorders: primary hereditary diseases of the retina, choroid, and vitreous: *review article*, 903
Gene transcription, Parental origin of transcription from the human GNAS1 gene, 163 *abs*, 607
Genetic counselling, The impact of genetic counselling on females in fragile X families, 950
Genetic differences, Culture, kinship and genes: *conference report*, 893
Genetic dominance, The molecular basis of genetic dominance: *review article*, 89
Genetic epidemiology, Genetic epidemiology of single gene defects in Chile, 702
Genetic services, Client satisfaction as outcome measure for audit of a clinical genetic service, 170 *abs*
Genetic testing
The genetic testing of children: *editorial*, 743
The genetic testing of children, 785
Genetics, Genetics in art, 420
Genital tract function, Genital tract function in men with Noonan syndrome, 468
Genome, The morbid anatomy of the human genome: chromosomal location of mutations causing disease: *review article*, 265
GNAS1 gene, Parental origin of transcription from the human GNAS1 gene, 163 *abs*, 607
Growth hormone deficiency, Analysis of human growth hormone gene 5′ sequences in isolated growth hormone deficiency patients, 81
Growth hormone receptor deficiency, Facial morphometry of Ecuadorian patients with growth hormone receptor deficiency/Laron syndrome, 635
Gsα gene mutations, Parental origin of Gsα gene mutations in Albright's hereditary osteodystrophy, 835

Half cryptic translocation t(9;17), Familial half cryptic translocation t(9;17), 712
Hamartomata, Allele loss on chromosome 16p in hamartomata and tumours from patients with tuberous sclerosis, 164 *abs*
Hand malformations, Phenotypic analysis of triphalangeal thumb and associated hand malformations, 462
Hand/foot defects, Cleft hand/foot: clinical and developmental aspects: *syndrome of the month*, 726
Haplotype FD1-D9S202, Linkage disequilibrium between FD1-D9S202 haplotypes and the Friedreich's ataxia locus in a central-southern Italian population, 133
Hearing loss, Familial leuconychia, knuckle pads, hearing loss, and palmoplantar hyperkeratosis: an additional family with Bart-Pumphrey syndrome, 68
Hemifacial atrophy, Progressive hemifacial atrophy with agenesis of the head of the caudate nucleus, 969
Hereditary disease, Mouse homologues of human hereditary disease: *review article*, 1
Hereditary haemorrhagic telangiectasia
Genetic heterogeneity in hereditary haemorrhagic telangiectasia, 925
Genetic heterogeneity in hereditary haemorrhagic telangiectasis: possible correlation with clinical phenotype, 927
Linkage of hereditary haemorrhagic telangiectasia to chromosome 9q34 and evidence for locus heterogeneity, 933
Hernia, Genetic study of indirect inguinal hernia, 187
Heterochromatin, An extra band within the human 9qh+ region that behaves like the surrounding constitutive heterochromatin, 632
Hirschsprung's disease
Hirschsprung's disease associated with a deletion of chromosome 10 (q11.2q21.2): a further link with the neurocristopathies?, 325
Long segment and short segment familial Hirschsprung's disease: variable clinical expression at the RET locus, 602
Human chorionic gonadotrophin, Impact of screening using maternal serum AFP and hCG on the birth incidence of Down's syndrome in the west of Scotland, 166 *abs*

Human growth hormone
Analysis of human growth hormone gene 5′ sequences in isolated growth hormone deficiency patients, 81
Facial morphometry of Ecuadorian patients with growth hormone receptor deficiency/Laron syndrome, 635
Human serum albumin gene, A point mutation in the human serum albumin gene results in familial dysalbuminaemic hyperthyroxinaemia, 355
Hunter's syndrome, Neurogenic bladder in Hunter's syndrome, 257
Huntington's chorea (disease)
Chemiluminescent detection of blotted PCR products (CB-PCR) of two CAG dynamic mutations (Huntington's disease and spinocerebellar ataxia type 1), 654
Clinical features and population genetics of juvenile Huntington's disease in Northern Ireland, 166 *abs*
Correlation of clinical features of Huntington's disease and the mutation in Grampian region, 173 *abs*
De novo mutation in a 3′HVR allele used as a paternity test in a family with Huntington's chorea, 173 *abs*
Expanded CAG trinucleotide repeat of Huntington's disease gene in a patient with schizophrenia and normal striatal histology: *letter*, 658
Guidelines for the molecular genetics predictive test in Huntington's disease, 555
HC (CAG)n amplified repeat analysis in Wessex, 174 *abs*
Huntington's disease in two unrelated Arab kindreds and in an Afghani family resident in Saudi Arabia: *letter*, 819
Instability of CAG repeats in Huntington's disease, 377
Mutation size and age at onset in Huntington's disease, 166 *abs*
Study of the Huntington's disease gene CAG repeats in schizophrenic patients shows overlap of the normal and HD affected ranges but absence of correlation with schizophrenia, 690
Trinucleotide repeat length and progression of illness in Huntington's disease, 872
Hydrocephalus
Genetic heterogeneity in X linked hydrocephalus: a family showing linkage to markers in Xq27.3, 167 *abs*
Hydrocephalus in an infant with trisomy 22, 141
Hyperphenylalaninaemia, Non-phenylketonuria hyperphenylalaninaemia mutations in Northern Ireland, 163 *abs*
Hypertension, Angiotensin I converting enzyme polymorphism in different groups and its association with hypertension, plasma renin activity, and aldosterone, 172 *abs*
Hypospadias, Two brothers with characteristic facial appearance, severe psychomotor retardation, hypospadias, contractures, and other symptoms: a new recessive syndrome?, 65
Hypotonia, A syndrome of hypotonia, psychomotor retardation, seizures, delayed and dysharmonic skeletal maturation, and congenital fibre type disproportion, 405

Ile119→Met mutation, Homozygosity for a new mutation (Ile119→Met) in the insulin receptor gene in five sibs with familial insulin resistance, 715
Imprinting
Imprinting in development and disease, 162 *abs*
Possible role of imprinting in the Turner phenotype, 840
Incomplete congenital stationary night blindness gene, Indentification of a key recombinant which assigns the incomplete congenital stationary night blindness gene proximal to MAOB, 580
Incontinentia pigmenti, A clinical and genetic study of incontinentia pigmenti, 175 *abs*
Indexing, Indexing *Journal of Medical Genetics*, 428
Indirect inguinal hernia, Genetic study of indirect inguinal hernia, 187
Inherited disorders, Workshop on inherited disorders and their genes in different European populations, Obernai, Strasbourg, France, 26–30 November 1993: *conference report*, 346
Insulin receptor gene, Homozygosity for a new mutation (Ile119→Met) in the insulin receptor gene in five sibs with familial insulin resistance, 715
Intelligence quotient, Intelligence quotient profile in myotonic dystrophy, intergenerational deficit, and correlation with CTG amplification, 300
Intracerebral aneurysms, 3-M syndrome and intracerebral aneurysms: *letter*, 898
Intrachromosomal triplication, Intrachromosomal triplication of 15q11-q13, 798
Inv dup(15) supernumerary marker, Inv dup(15) supernumerary marker chromosomes: *review article*, 585
Inversion
A case of direct duplication of part of 2p: ?related to paternal pericentric inversion of chromosome 2, 169 *abs*
Familial pericentric inversion of chromosome 1 (p34q23) and male infertility with stage specific spermatogenic arrest, 573
Familial pericentric inversion inv(8)(p23q11), 201
Paternal pericentric inversion of chromosome 4 as a cause of recurrent pregnancy loss, 153
Italy
Apolipoprotein CII-Padova (Tyr→stop) as a cause of chylomicronaemia in an Italian kindred from Siculiana, 622
Linkage disequilibrium between FD1-D9S202 haplotypes and the Friedreich's ataxia locus in a central-southern Italian population, 133

Journal abstracts, 83, 176, 259, 348, 504, 656, 818, 895
Journal of Medical Genetics, Indexing *Journal of Medical Genetics*, 428
Juvenile retinoschisis, Refinement of the chromosomal position of the X linked juvenile retinoschisis gene, 972

K variant, A new detection method for the K variant of butyrylcholinesterase based on PCR primer introduced restriction analysis (PCR-PIRA), 576
Kalow allele, A PCR based method to determine the Kalow allele of the cholinesterase gene: the E_1^k allele frequency and its significance in the normal population, 248
Kartagener's syndrome, Unusual inheritance of primary ciliary dyskinesia (Kartagener's syndrome), 493
Kearns-Sayre syndrome, Juvenile Kearns-Sayre syndrome initially misdiagnosed as a psychosomatic disorder, 45
Keratin gene cluster, A gene for pachyonychia congenita is closely linked to the keratin gene cluster on 17q12–q21, 675
Keratosis punctata palmaris et plantaris, Keratosis punctata palmaris et plantaris: an autosomal dominantly inherited keratoderma associated with malignancy, 168 *abs*
Knuckle pads, Familial leuconychia, knuckle pads, hearing loss, and palmoplantar hyperkeratosis: an additional family with Bart-Pumphrey syndrome, 68
Kyphomelic dysplasia, Kyphomelic dysplasia: *letter*, 423

Laminin A variant gene, A laminin A variant gene (LAMA3) is present on chromosome 6q21, 164 *abs*
Laron syndrome, Facial morphometry of Ecuadorian patients with growth hormone receptor deficiency/Laron syndrome, 635
Laurin-Sandrow syndrome, Laurin-Sandrow syndrome

(mirror hands and feet and nasal defects): description of a new case, 410
Leber's hereditary optic neuropathy
Leber's hereditary optic neuropathy: correlations between mitochondrial genotype and visual outcome, 280
Mitochondrial mutation commonly associated with Leber's hereditary optic neuropathy observed in a patient with Wolfram syndrome (DIDMOAD), 328
Leprechaunism
First British molecular prenatal diagnosis for leprechaunism, 170 *abs*
Homozygosity for a new mutation (Ile119→Met) in the insulin receptor gene in five sibs with familial insulin resistance, 715
Lethal congenital contracture syndrome, Lethal congenital contracture syndrome: further delineation and genetic aspects, 521
Leuconychia, Familial leuconychia, knuckle pads, hearing loss, and palmoplantar hyperkeratosis: an additional family with Bart-Pumphrey syndrome, 68
Leukaemia
Acute myeloid leukaemia in a patient with Seckel syndrome, 148
Bone marrow proliferation as reflected in ALL cytogenetics: relevance for prognosis and treatment, 164 *abs*
Lhermitte-Duclos disease, Cowden syndrome and Lhermitte-Duclos disease in a family, 458
Li-Fraumeni syndrome, A variant of the Li-Fraumeni syndrome: an analysis of two further families, 168 *abs*
Limb/pelvis-hypoplasia/aplasia syndrome, The possible Middle East origin of the mutation for the limb/pelvis-hypoplasia/aplasia syndrome: *letter*, 897
Linkage disequilibrium, Linkage disequilibrium between FD1-D9S202 haplotypes and the Friedreich's ataxia locus in a central-southern Italian population, 133
Liver, Liver histology in the arthrogryposis multiplex congenita, renal dysfunction, and cholestasis (ARC) syndrome, 62: *letter*, 820
Loss of constitutional heterozygosity data, The use of loss of constitutional heterozygosity data to ascertain the location of predisposing genes in cancer families, 448
Lymphocyte chromosomes, Instability of lymphocyte chromosomes in a girl with Rothmund-Thomson syndrome, 570

3-M syndrome, 3-M syndrome and intracerebral aneurysms: *letter*, 898
Male infertility, Familial pericentric inversion of chromosome 1 (p34q23) and male infertility with stage specific spermatogenic arrest, 573
Malignant hyperthermia, Genetic heterogeneity in malignant hyperthermia, 164 *abs*
Manic depressive illness, No association between dopamine D4 receptor polymorphism and manic depressive illness: *letter*, 897
Marfan syndrome
A new missense mutation of fibrillin in a patient with Marfan syndrome, 338
Ascertainment and severity of Marfan syndrome in a Scottish population, 51
Screening for fibrillin (FBN1) mutations in Marfan syndrome, 162 *abs*
Maternal serum
Changes in the maternal serum concentrations of PAPP-A and SP-1 in Down's syndrome pregnancies between the first and second trimesters, 170 *abs*
Maternal serum screening for Down's syndrome and other fetal chromosomal abnormalities, 166 *abs*
Meckel syndrome, Meckel syndrome: what are the minimum diagnostic criteria?, 482
Medical audit, Client satisfaction as outcome measure for audit of a clinical genetic service, 170 *abs*
Medical genetics, advances in brief, 83, 176, 259, 348, 504, 583, 656, 818, 895
Mediterranean anaemia, Prevention of Mediterranean anaemia in Latium, Italy, today: *letter*, 86
Medium chain acyl-CoA dehydrogenase, Rapid detection of medium chain acyl-CoA dehydrogenase gene mutations by non-radioactive, single strand conformation polymorphism minigels, 551
Meiotic drive, Meiotic drive at the myotonic dystrophy locus: *letter*, 980
MELAS syndrome, Comparison of the relative levels of the 3243 (A→G) mtDNA mutation in heteroplasmic adult and fetal tissues, 41
Menkes disease, First trimester prenatal diagnosis of Menkes disease by DNA analysis, 615
Mental retardation
A syndrome of hypotonia, psychomotor retardation, seizures, delayed and dysharmonic skeletal maturation, and congenital fibre type disproportion, 405
Linkage of a non-specific X linked mental retardation gene to Xq26.1, 172 *abs*
Two brothers with characteristic facial appearance, severe psychomotor retardation, hypospadias, contractures, and other symptoms: a new recessive syndrome?, 65
X linked mental retardation with non-deletional thalassaemia (ATR-X): further delineation of the phenotype, 245
Mesangial sclerosis, Microcephaly and congenital nephrotic syndrome owing to diffuse mesangial sclerosis: an autosomal recessive syndrome, 121
Metachromatic leucodystrophy
A single origin for the most frequent mutation causing late infantile metachromatic leucodystrophy, 672
The arylsulphatase A gene and molecular genetics of metachromatic leucodystrophy: *review article*, 663
Micrognathia, Anophthalmia with cleft palate and micrognathia: a new syndrome?, 960
Microphthalmos, Autosomal dominant simple microphthalmos, 721
Microsatellite marker, X linked myotubular myopathy (MTM1) maps between DXS304 and DXS305, closely linked to the DXS455 VNTR and a new, highly informative microsatellite marker (DXS1684), 922
Microsatellites, Automated analysis of multiplex microsatellites, 937
Minigels, Rapid detection of medium chain acyl-CoA dehydrogenase gene mutations by non-radioactive, single strand conformation polymorphism minigels, 551
Mismatch analysis, Amplification mismatch analysis as a method of screening for mutations in genetic disorders, 162 *abs*
Mitochondrial encephalopathy, Comparison of the relative levels of the 3243 (A→G) mtDNA mutation in heteroplasmic adult and fetal tissues, 41
Mitochondrial mutation, Mitochondrial mutation commonly associated with Leber's hereditary optic neuropathy observed in a patient with Wolfram syndrome (DIDMOAD), 328
Mitochondrial myopathy
Juvenile Kearns-Sayre syndrome initially misdiagnosed as a psychosomatic disorder, 45
Screening service for mitochondrial myopathy: is non-invasive diagnosis possible in the younger age group? 171 *abs*
Molecular analysis, Duplication of 16q22→qter confirmed by fluorescence in situ hybridisation and molecular analysis, 884
Molecular biology, The molecular basis of genetic dominance: *review article*, 89
Molecular genetics predictive test, Guidelines for the molecular genetics predictive test in Huntington's disease, 555
Mosaicism
18q− and 18q+ mosaicism in a mentally retarded boy (46,XY,del(18)(q21)/46,XY,iso psu dic(18)(q23)), 168 *abs*
Mosaicism with a normal cell line and an autosomal structural rearrangement, 108

Screening for Y mosaicism in patients with Turner's syndrome, 163 *abs*

Mouse homologues, Mouse homologues of human hereditary disease: *review article*, 1

mtDNA mutation
Comparison of the relative levels of the 3243 (A→G) mtDNA mutation in heteroplasmic adult and fetal tissues, 41
Juvenile Kearns-Sayre syndrome initially misdiagnosed as a psychosomatic disorder, 45

Muir-Torre syndrome, Muir-Torre syndrome: a variant of the cancer family syndrome, 627

Multiple endocrine neoplasia type 1, Genetic studies of thymic carcinoids in multiple endocrine neoplasia type 1: *letter*, 261

Mulvihill-Smith syndrome, Mulvihill-Smith syndrome, 707

Muscular dystrophy, Linkage analysis of families with severe childhood autosomal recessive muscular dystrophy in Morocco indicates genetic homogeneity of the disease in North Africa, 342

Mutation analysis, Mutation analysis in 600 French cystic fibrosis patients, 541

Mutations, Amplification mismatch analysis as a method of screening for mutations in genetic disorders, 162 *abs*

Myasthenia gravis, Myasthenia gravis: an important cause of the Pena-Shokeir phenotype, 167 *abs*

Myotonic dystrophy
A case of paternally inherited congenital myotonic dystrophy, 397
Absence of myotonic dystrophy in southern African Negroids is associated with a significantly lower number of CTG trinucleotide repeats, 37
Anticipation resulting in elimination of the myotonic dystrophy gene: a follow up study of one extended family, 595
Diagnostic experience of analysis for myotonic dystrophy, 171 *abs*
French myotonic dystrophy families show expansion of a CTG repeat in complete linkage disequilibrium with an intragenic 1 kb insertion, 33
High CTG repeat number in nodular thyroid tissue from a myotonic dystrophy patient, 891
Intelligence quotient profile in myotonic dystrophy, intergenerational deficit, and correlation with CTG amplification, 300
Meiotic drive at the myotonic dystrophy locus: *letter*, 980
Origin of a regressed myotonic dystrophy allele, 130
Paternal transmission of congenital myotonic dystrophy, 518

Myotubular myopathy, X linked myotubular myopathy (MTM1) maps between DXS304 and DXS305, closely linked to the DXS455 VNTR and a new, highly informative microsatellite marker (DXS1684), 922

Nanophthalmos, Autosomal dominant simple microphthalmos, 721

Nemaline myopathy, Exclusion of two candidate loci for autosomal recessive nemaline myopathy, 79

Nephrotic syndrome, Microcephaly and congenital nephrotic syndrome owing to diffuse mesangial sclerosis: an autosomal recessive syndrome, 121

Neural tube defects, Female predisposition to cranial neural tube defects is not because of a difference between the sexes in the rate of embryonic growth or development during neurulation, 383

Neurocristopathies, Hirschsprung's disease associated with a deletion of chromosome 10 (q11.2q21.2): a further link with the neurocristopathies?, 325

Neurofibromatosis
Identification of two novel mutations within the neurofibromatosis-1 gene by means of amplification and mismatch detection, 175 *abs*
Identifying and characterising pathological mutations in the NF2 gene, 168 *abs*

Neurofibromatosis type 1, Neurofibromatosis type 1 in Israel: survey of young adults, 853

Neurogenic bladder, Neurogenic bladder in Hunter's syndrome, 257

Neurulation, Female predisposition to cranial neural tube defects is not because of a difference between the sexes in the rate of embryonic growth or development during neurulation, 383

Neutropenia, Prenatal diagnosis of X linked cardiomyopathy with neutropenia (Barth's syndrome) using DXS15 (DX13), 169 *abs*

Niemann-Pick disease type C, Complementation studies in Niemann-Pick disease type C indicate the existence of a second group, 317

Night blindness gene, Identification of a key recombinant which assigns the incomplete congenital stationary night blindness gene proximal to MAOB, 580

Nodular thyroid tissue, High CTG repeat number in nodular thyroid tissue from a myotonic dystrophy patient, 891

Non-phenylketonuria hyperphenylalaninaemia, Non-phenylketonuria hyperphenylalaninaemia mutations in Northern Ireland, 163 *abs*

Noonan syndrome, Genital tract function in men with Noonan syndrome, 468

North Africa, Linkage analysis of families with severe childhood autosomal recessive muscular dystrophy in Morocco indicates genetic homogeneity of the disease in North Africa, 342

Northern epilepsy syndrome, Northern epilepsy syndrome: an inherited childhood onset epilepsy with associated mental deterioration, 177

Norway, Aspartylglucosaminuria in northern Norway: a molecular and genealogical study, 360

Notices, 88, 350, 584, 662, 742, 822, 982

Ornithine transcarbamylase gene, A new informative *Nco* I RFLP in the 3′UTR of the OTC gene, 172 *abs*

Osteocraniostenosis, Osteocraniostenosis, 772

Osteogenesis imperfecta, Determination of a new collagen type I 2 gene point mutation which causes a Gly640 Cys substitution in osteogenesis imperfecta and prenatal diagnosis by DNA hybridisation, 965

Pachyonychia congenita, A gene for pachyonychia congenita is closely linked to the keratin gene cluster on 17q12–q21, 675

Pai syndrome, A further patient with Pai syndrome with autosomal dominant inheritance?, 497

Pallister-Hall syndrome, Recurrence of Pallister-Hall syndrome in two sibs, 145: *letters*, 740

Palmoplantar hyperkeratosis, Familial leuconychia, knuckle pads, hearing loss, and palmoplantar hyperkeratosis: an additional family with Bart-Pumphrey syndrome, 68

Pancreatic hypoplasia, Hereditary pancreatic hypoplasia, diabetes mellitus, and congenital heart disease: a new syndrome?, 331

Partial monosomy, Partial monosomy of 7q32 in a case of de novo rcp(7;15)(q32;q15), 413

Patent ductus arteriosus, Further family with autosomal dominant patent ductus arteriosus: *letter*, 659

Paternal inheritance
A case of paternally inherited congenital myotonic dystrophy, 397
Paternal transmission of congenital myotonic dystrophy, 518

Peculiar face, Natural history and postmortem anatomy of a patient with tetra-amelia, ectodermal dysplasia, peculiar face, and developmental retardation (MIM 273390): *letter*, 980

Pena-Shokeir phenotype, Myasthenia gravis: an important cause of the Pena-Shokeir phenotype, 167 *abs*

Phenylalanine hydroxylase deficiency, Non-phenylketonuria hyperphenylalaninaemia mutations in Northern Ireland, 163 *abs*

Point mutations, On the origin of deletions and point

mutations in Duchenne muscular dystrophy: most deletions arise in oogenesis and most point mutations result from events in spermatogenesis, 183
Polycystic kidney disease, Skeletal malformations and polycystic kidney disease: *letter*, 741
Polymerase chain reaction
Forensic medicine, PCR, and Bayesian approach: *letter*, 896
Rapid detection of medium chain acyl-CoA dehydrogenase gene mutations by non-radioactive, single strand conformation polymorphism minigels, 551
Polymerase chain reaction primer introduced restriction analysis, A new detection method for the K variant of butyrylcholinesterase based on PCR primer introduced restriction analysis (PCR-PIRA), 576
Portugal, A study of 159 Portuguese patients with familial amyloidotic polyneuropathy (FAP) whose parents were both unaffected, 293
Prader-Willi-like phenotype, Clinical and molecular studies in fragile X patients with a Prader-Willi-like phenotype: *letters*, 260, 820
Prader-Willi syndrome
A male with a de novo translocation involving loss of 15q11q13 material and Prader-Willi syndrome, 478
Molecular and cytogenetic analysis of 29 Prader-Willi syndrome patients, 175 *abs*
Prader-Willi/Angelman syndrome, Automated analysis of multiplex microsatellites, 937
Predisposition to cancer, The use of loss of constitutional heterozygosity data to ascertain the location of predisposing genes in cancer families, 448
Pregnancy
Changes in the maternal serum concentrations of PAPP-A and SP-1 in Down's syndrome pregnancies between the first and second trimesters, 170 *abs*
Paternal pericentric inversion of chromosome 4 as a cause of recurrent pregnancy loss, 153
Prenatal diagnosis
First British molecular prenatal diagnosis for leprechaunism, 170 *abs*
Prenatal diagnosis of fragile X syndrome: management of the male fetus with a premutation, 170 *abs*
Prenatal diagnosis of X linked cardiomyopathy with neutropenia (Barth's syndrome) using DXS15 (DX13), 169 *abs*
Primary ciliary dyskinesia, Unusual inheritance of primary ciliary dyskinesia (Kartagener's syndrome), 493
Primed in situ labelling (PRINS), Pseudodicentric chromosome 18 diagnosed by chromosome painting and primed in situ labelling (PRINS), 99
Pseudoachondroplastic dysplasia, Two sibs who are double heterozygotes for achondroplasia and pseudoachondroplastic dysplasia, 565
Pseudohypoparathyroidism, Paternal and maternal transmission of pseudohypoparathyroidism type Ia in a family with Albright hereditary osteodystrophy: no evidence of genomic imprinting: *letter*, 84
Pulmonary atresia, Pulmonary atresia associated with maternal 22q11.2 deletion: possible parent of origin effect in the conotruncal anomaly face syndrome, 830
Pyridoxine-refractory congenital sideroblastic anaemia, Pyridoxine-refractory congenital sideroblastic anaemia with evidence for autosomal inheritance: exclusion of linkage to ALAS2 at Xp11.21 by polymorphism analysis, 213
Pyruvate dehydrogenase deficiency, Pyruvate dehydrogenase deficiency: *syndrome of the month*, 875

Rabson-Medenhall syndrome, Homozygosity for a new mutation (Ile119→Met) in the insulin receptor gene in five sibs with familial insulin resistance, 715
Rapp-Hodgkin syndrome, Cephalometric analysis of Rapp-Hodgkin syndrome, 758
Read Codes, The Read Codes in clinical genetics, 166 *abs*
Renal dysfunction, Liver histology in the arthrogryposis multiplex congenita, renal dysfunction, and cholestasis (ARC) syndrome, 62: *letter*, 820
Renal hypoplasia, A newborn with ring chromosome 10, aganglionic megacolon, and renal hypoplasia, 804
Renin activity, Angiotensin I converting enzyme polymorphism in different groups and its association with hypertension, plasma renin activity, and aldosterone, 172 *abs*
RET locus, Long segment and short segment familial Hirschsprung's disease: variable clinical expression at the RET locus, 602
Retina, inherited disease, Recent advances in the gene map of inherited eye disorders: primary hereditary diseases of the retina, choroid, and vitreous: *review article*, 903
Retinal pigment epithelium, Genetic heterogeneity of congenital hypertrophy of the retinal pigment epithelium (CHRPE) in families with familial adenomatous polyposis, 55
Retinitis pigmentosa, Retinitis pigmentosa families showing apparent X linked inheritance but unlinked to the RP2 or RP3 loci, 848
Retinoic acid receptor locus, Interpreting the evidence for an association between the retinoic acid receptor locus and non-syndromic cleft lip with or without cleft palate: *letter*, 425
Retinoschisis, Refinement of the chromosomal position of the X linked juvenile retinoschisis gene, 972
Rieger eye malformation, Genetic heterogeneity in Rieger eye malformation, 340
Ring chromosome 10, A newborn with ring chromosome 10, aganglionic megacolon, and renal hypoplasia, 804
Ring (X) cell line, A comparison of the clinical and cytogenetic findings in nine patients with a ring (X) cell line and 16 45,X patients, 528
Robertsonian translocation
De novo 14q32 microdeletion on an inherited t(14; 21) Robertsonian translocation resulting in multiple congenital abnormalities in an apparently balanced translocation carrier, 169 *abs*
Parental origin of the X chromosome in a patient with a Robertsonian translocation and Turner's syndrome, 255
Rothmund-Thomson syndrome, Instability of lymphocyte chromosomes in a girl with Rothmund-Thomson syndrome, 570

Saethre-Chotzen syndrome, Saethre-Chotzen syndrome: *syndrome of the month*, 393
Schizophrenia
Expanded CAG trinucleotide repeat of Huntington's disease gene in a patient with schizophrenia and normal striatal histology: *letter*, 658
Homozygosity at the dopamine D3 receptor locus is not associated with schizophrenia: *letter*, 260
Study of the Huntington's disease gene CAG repeats in schizophrenic patients shows overlap of the normal and HD affected ranges but absence of correlation with schizophrenia, 690
Sclerosteosis, Sclerosteosis in a Spanish male: first report in a person of Mediterranean origin, 976
Scotland
Ascertainment and severity of Marfan syndrome in a Scottish population, 51
Facial clefts in the west of Scotland in the period 1980–1984: epidemiology and genetic diagnoses, 126
Screening, The impact of population based screening for carriers of cystic fibrosis, 364
Seckel syndrome, Acute myeloid leukaemia in a patient with Seckel syndrome, 148
Segregation analysis, Segregation analysis of Alagille syndrome, 453
Segregation ratios, Low segregation ratios in autosomal recessive disorders: *letter*, 85

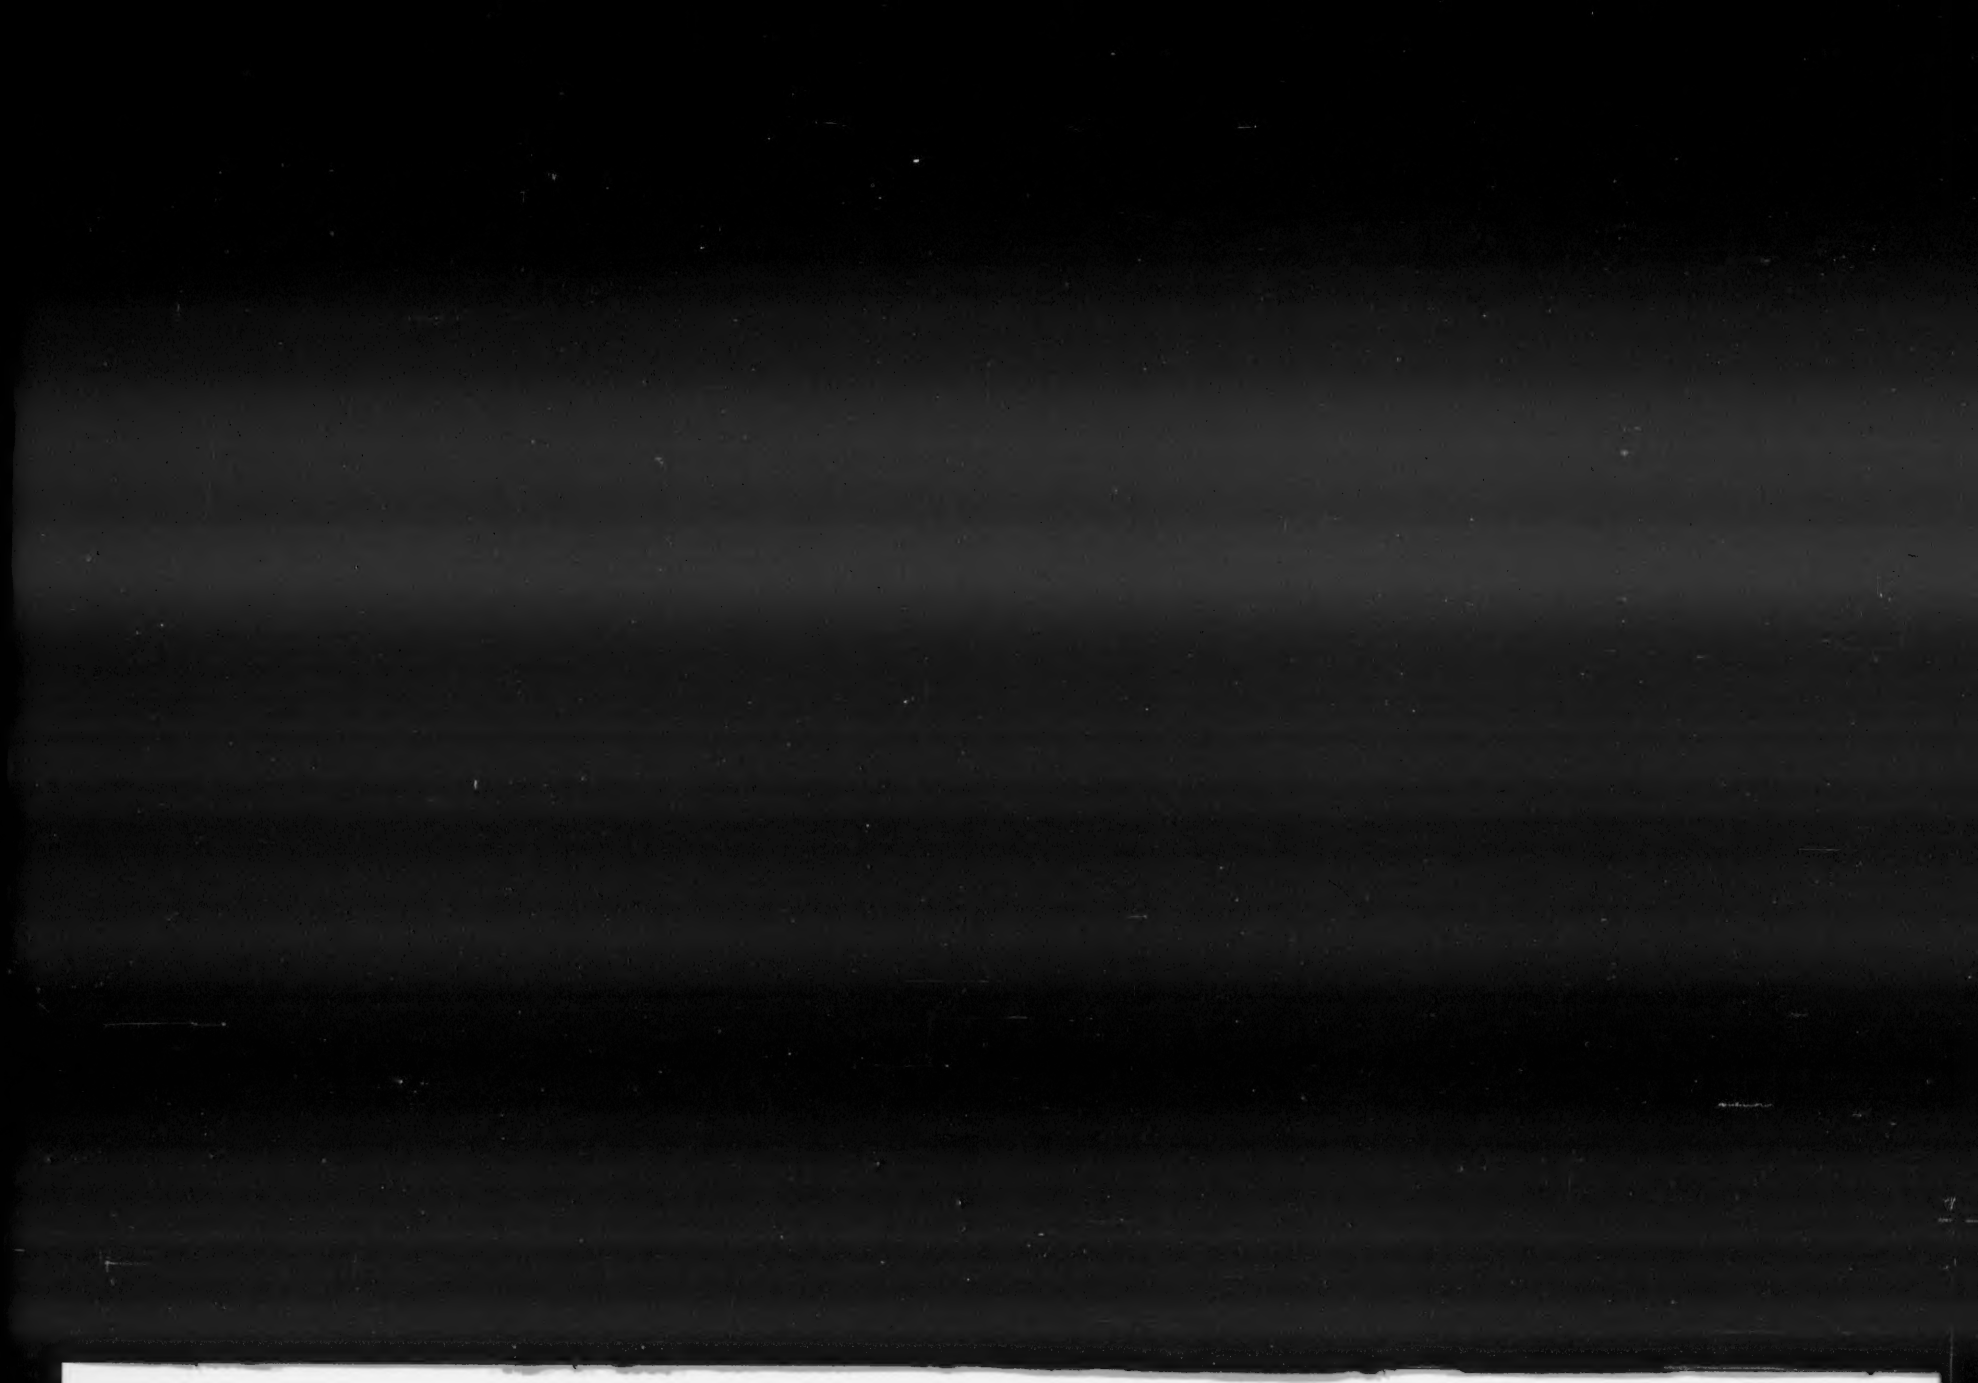
Sessile colonic adenomas, Deletions of the entire APC gene are associated with sessile colonic adenomas: *letter*, 426
Severe combined immunodeficiency
Deletion mapping of the DXS986, DXS995, and DXS1002 loci defines their order within Xq21, 344
Trisomy X in a female member of a family with X linked severe combined immunodeficiency: implications for carrier diagnosis, 717
Sideroblastic anaemia, Pyridoxine-refractory congenital sideroblastic anaemia with evidence for autosomal inheritance: exclusion of linkage to ALAS2 at Xp11.21 by polymorphism analysis, 213
Single gene defects, Genetic epidemiology of single gene defects in Chile, 702
Single strand conformation polymorphism minigels, Rapid detection of medium chain acyl-CoA dehydrogenase gene mutations by non-radioactive, single strand conformation polymorphism minigels, 551
Skeletal analysis, Diagnostic distinction between anencephaly and amnion rupture sequence based on skeletal analysis, 823
Skeletal malformations, Skeletal malformations and polycystic kidney disease: *letter*, 741
Skeletogenital syndrome, The newly recognised skeletogenital syndrome: *letter*, 505
Skin pigmentary anomaly, Asymmetry and skin pigmentary anomalies in chromosome mosaicism, 694
Sotos syndrome, Sotos syndrome: a study of the diagnostic criteria and natural history, 20
Spastic paraplegia, Spastic paraplegia, dysarthria, brachydactyly, and cone shaped epiphyses: confirmation of the Fitzsimmons syndrome, 251
Spermatogenic arrest, Familial pericentric inversion of chromosome 1 (p34q23) and male infertility with stage specific spermatogenic arrest, 573
Spinal muscular atrophy
Apparent SMA I unlinked to 5q, 242
Prenatal diagnosis of spinal muscular atrophy, 167 *abs*
Spinocerebellar ataxia type 1, Chemiluminescent detection of blotted PCR products (CB-PCR) of two CAG dynamic mutations (Huntington's disease and spinocerebellar ataxia type 1), 654
Spondyloepimetaphyseal dysplasia
New X linked spondyloepimetaphyseal dysplasia: a report on eight affected males in the same family, 371
Spondyloepimetaphyseal dysplasia with joint laxity (SEMDJL): *syndrome of the month*, 136
Stargardt's disease, Stargardt's disease is not allelic to the genes for neuronal ceroid lipofuscinoses, 222
Superoxide dismutase, Identification of the superoxide dismutase (SOD1) Ile113Thr mutation in three unrelated amyotrophic lateral sclerosis patients, 175 *abs*
Sweden
Anticipation in Swedish families with bipolar affective disorder, 686
Charcot-Marie-Tooth disease in northern Sweden: pedigree analysis and the presence of the duplication in chromosome 17p11.2, 435
Geographical distribution of TTR met30 carriers in northern Sweden: discrepancy between carrier frequency and prevalence rate, 351
Syndactyly, Syndactyly, ectodermal dysplasia, and cleft lip/palate: *syndrome of the month*, 957
Syndrome of the month, Syndrome of the month: *annotation*, 744

Teeth, A new dominantly inherited ectodermal dysplasia presenting with natal teeth, 171 *abs*
Testis determining gene(s), Testis determining gene(s) on the X chromosome short arm: chromosomal localisation and possible role in testis determination: *letter*, 349
Tetra-amelia, Natural history and postmortem anatomy of a patient with tetra-amelia, ectodermal dysplasia, peculiar face, and developmental retardation (MIM 273390): *letter*, 980
Tetrasomy, Multiple origins of X chromosome tetrasomy: *letter*, 424
Thalassaemias
Prevention of Mediterranean anaemia in Latium, Italy, today: *letter*, 86
Thalassaemia in Azerbaijan, 209
The origin of the β thalassaemia mutations in the United Arab Emirates, 165 *abs*
The spectrum of β thalassaemia mutations in the UAE national population, 59
X linked mental retardation with non-deletional thalassaemia (ATR-X): further delineation of the phenotype, 245
Thrombocytopenia, X linked thrombocytopenia in a large Danish pedigree, 167 *abs*
Thymic carcinoids, Genetic studies of thymic carcinoids in multiple endocrine neoplasia type 1: *letter*, 261
Transcription, Parental origin of transcription from the human GNAS1 gene, 163 *abs*, 607
Transforming growth factor beta, Analysis of a fibrillin TGFβ-bp motif: putative cell adhesion properties, 174 *abs*
Translocation
A male with a de novo translocation involving loss of 15q11q13 material and Prader-Willi syndrome, 478
Assessment of Yqh translocations, 978
Balanced reciprocal whole arm translocation t(3;9): analysis by fluorescence in situ hybridisation, 74
Diaphragmatic herniae and translocations involving 8q22 in two patients, 735
Familial half cryptic translocation t(9;17), 712
Value of chromosome painting in determining the chromosomal outcome of offspring of a 12;16 translocation carrier, 234
X;Y translocation in a girl with short stature and some features of Turner's syndrome: cytogenetic and molecular studies, 649
Transthyretin
Amyloid polyneuropathy in two German-American families: a new transthyretin variant (Val 107), 416
Geographical distribution of TTR met30 carriers in northern Sweden: discrepancy between carrier frequency and prevalence rate, 351
Trinucleotide repeat length, Trinucleotide repeat length and progression of illness in Huntington's disease, 872
Triphalangeal thumb, Phenotypic analysis of triphalangeal thumb and associated hand malformations, 462
Trisomy
FISH detection of trisomy 21 in interphase by the simultaneous use of two differently labelled cosmid contigs, 679
Hydrocephalus in an infant with trisomy 22, 141
Molecular analysis of human trisomies 13 and 18, 175 *abs*
Partial trisomy for 2q in a patient with dir dup(2)(q33.1q35), 652
Partial trisomy 3q causing mild Cornelia de Lange phenotype, 150
Trisomy 12 mosaicism in a 7 year old girl with dysmorphic features and normal mental development, 253
Trisomy 18 and trisomy 21 mosaicism in a Down's syndrome patient, 418
Trisomy 8 syndrome owing to isodicentric 8p chromosomes: regional assignment of a presumptive gene involved in corpus callosum development, 238
Trisomy X in a female member of a family with X linked severe combined immunodeficiency: implications for carrier diagnosis, 717
Tuberous sclerosis
Allele loss on chromosome 16p in hamartomata and tumours from patients with tuberous sclerosis, 164 *abs*

Phenotypic variation of tuberous sclerosis in a single extended kindred, 761
Turner phenotype, Possible role of imprinting in the Turner phenotype, 840
Turner's syndrome
A comparison of the clinical and cytogenetic findings in nine patients with a ring (X) cell line and 16 45, X patients, 528
Balanced reciprocal whole arm translocation t(3;9): analysis by fluorescence in situ hybridisation, 74
Identification by molecular diagnosis of mosaic Turner's syndrome in an obligate carrier female for fragile X syndrome, 76
Parental origin of the X chromosome in a patient with a Robertsonian translocation and Turner's syndrome, 255
Screening for Y mosaicism in patients with Turner's syndrome, 163 *abs*
X;Y translocation in a girl with short stature and some features of Turner's syndrome: cytogenetic and molecular studies, 649
Twins
X inactivation patterns in female monozygotic twins and their families, 754
X inactivation studies in female monozygotic twins, 169 *abs*

Ultrasonography, Diagnosis of adult polycystic kidney disease by genetic markers and ultrasonographic imaging in a voluntary family register, 115
Uniparental disomy
A systemic search for uniparental disomy, 163 *abs*
"Compensatory" uniparental disomy of chromosome 21 in two cases, 534
Mosaic uniparental disomy in Beckwith-Wiedemann syndrome, 749
Uniparental disomy in man, 162 *abs*
United Arab Emirates
Origin of the β thalassaemia mutations in the United Arab Emirates, 165 *abs*
Spectrum of β thalassaemia mutations in the UAE national population, 59
Urinary tract abnormalities, Urinary tract abnormalities in Emilia Romagna (Italy), 171 *abs*

VATER, Drug induced VATER association: is dibenzepin a possible cause: *letter*, 423
Velocardiofacial syndrome, Velocardiofacial syndrome and DiGeorge sequence: *letter*, 423
Ventriculoseptal defect, Pulmonary atresia associated with maternal 22q11.2 deletion: possible parent of origin effect in the conotruncal anomaly face syndrome, 830
Vitreoretinopathies, Recent advances in the gene map of inherited eye disorders: primary hereditary diseases of the retina, choroid, and vitreous: *review article*, 903
VNTR probe, De novo mutation in a 3'HVR allele used as a paternity test in a family with Huntington's chorea, 173 *abs*

Wilms' tumour, The French Wilms' tumour study: no clear evidence for cancer prone families, 429
Wolf-Hirschhorn syndrome, Molecular characterisation of chromosome 4p deletions resulting in Wolf-Hirschhorn syndrome, 103
Wolfram syndrome, Mitochondrial mutation commonly associated with Leber's hereditary optic neuropathy observed in a patient with Wolfram syndrome (DIDMOAD), 328


45,X cell line, A comparison of the clinical and cytogenetic findings in nine patients with a ring (X) cell line and 16 45,X patients, 528
X inactivation, X inactivation studies in female monozygotic twins, 169 *abs*
X linked spondyloepimetaphyseal dysplasia, New X linked spondyloepimetaphyseal dysplasia: a report on eight affected males in the same family, 371
